

SC4 TEX COAT

Description:

SC4 Tex Coat by Innovacar is a **protective waterproofing spray for all types of car fabrics and leather**. It can be used for **car roofs, seats, mats and the steering wheel**, practically on all the parts of your car made of fabric or leather that are used the most. It has an alcohol-based formula that makes it **dry quickly** to speed up the process.

Main features of our product:

- **Oil-water repellent effect:** thanks to the fluoropolymers in the formula, it creates a protective barrier, making the treated surface oil and water repellent.
- **Does not make the fabrics greasy:** it is a specific solution on fabrics that can protect them without making them greasy.
- **Antistatic and dustproof:** the final effect of the treatment prevents static energy from accumulating, which causes dust accumulation.
- **Protects against whitening and UV rays:** thanks to the absence of petroleum distillates, the product can withstand extreme temperatures without whitening or releasing oily substances.
- **Easier cleaning:** after the application, treated leather and fabrics are easier to maintain and clean.

Directions for use:

How to waterproof car leather and fabrics with SC4 Tex Coat:

1. Before proceeding with the treatment, check that the surface of the fabric or leather is clean and dry.
2. Apply 2 - 3 sprays of product on the surface and wait for it to dry; in case of leather, use a microfibre cloth to apply the product evenly.
3. After 20 minutes, an additional layer can be applied to enhance the effect.
4. Wait up to 7 hours after the application for complete activation. The effect lasts up to 3-6 months, depending on the treated surface.

Use: use the product undiluted.

Precautions: do not apply in the sun or on hot surfaces; the best performance is achieved with a well-cleaned and dry surface (fundamental for product performance).

Caution:

Observe the advice on the safety data sheet when handling the product.

Technical features:

Appearance and colour: colorless liquid

Odour: characteristic

pH: $6.6 \pm 0,5$

Flash point: $<23^{\circ}\text{C}$

Relative density: $0.80 \text{ g/cm}^3 \pm 0,05$

Solubility in water: soluble

Solubility in oil: partially soluble

Storage:

Unopened and stored at room temperature away from direct sunlight.
