INNOVACAR

S2 FOAMY PINK SWEET

Description:

Pink S2 Foam Color by Innovacar **is the car shampoo that generates a pink snow foam to clean your car effectively, even with a neutral pH. It also creates a colorful effect** specifically without compromising on the cleaning capacity of the original formula.

It represents the ideal alternative to achieving a thrill during the washing steps, without ruining the protection of previously applied nanotechnological protective films. The main features are:

- **Color effect active foam**: this creates a cheerful pink tinged foam that covers the entire bodywork of the car. Plus, the color aids the rinsing stage by making the residues clearly visible and making it possible to correctly manage the times and duration of this step.
- **Sweet watermelon fragrance**: during the application of the product it releases the summery scent of sweet watermelon.
- **Enzyme-based organic decontamination**: Pink S2 Foamy Color with added enzymes provides deep cleaning**, subject to patent protection*, this makes it a product suitable for organic decontamination and for fighting organic dirt with direct action on dirt substrate molecules.
- **Plant-derived** surfactants**:** thanks in part to the use of plant-derived surfactants and the absence of added phosphorus, EDTA and NTA*** is completely biodegradable.
- **Gentle touch on gaskets and plastics**: also with the aid of plant-based surfactants and no added sodium hydroxide, the product can reduce the "stress cracking" process on plastic.
- **PH neutral shampoo detergent**: The 6.00 pH of the detergent is neutral, making it a suitable solution to avoid damaging interactions with the nanotechnological protective films. It does not ruin previously applied layers.
- **High concentration**: thanks to the considerable concentration, it is possible to obtain effective cleaning and a high washing power also with the use of a small amount.

* Patent Application No. 14730984.3
** Compared to the version without enzymes
*** May contain traces.

Directions for use:

We recommend using Pink S2 Foamy car shampoo with a foam gun. The brightness of the color is based on the dilution of the product. Recommended use:

1. Dilute the product according to the indications and selected mode of use.
2. Stir the foam wand to mix the detergent and water to obtain a homogenous solution.
3. Deliver the foam over the entire car, starting on the bottom and applying it horizontally to then gradually move upwards. This will prevent any dripping during rinsing.
4. Proceed with rinsing with plenty of high pressure water. Work horizontally from the top of the car and gradually working downwards.

Be particularly careful to **rinse the car generously until all of the color is completely removed from the car** and hidden nooks.

If applied with a foam lance or foam gun: the recommended dilution ranges from 1:9 to 1:12, use from 100 ml to 75 ml of product and add the remaining part of water (from 900 ml to 925 ml) to obtain 1 L of ready-for-use solution. During supply, the actual final dilution can reach approximately 1:150 to 1:195.

INNOVACAR

For frequent washing the recommended dilution ranges from 1:25 to 1:50, use from 40 ml to 20 ml of product and add the remaining part of water (from 960 ml to 980 ml) to obtain 1 L of ready-for-use solution. While dispensing, the actual final dilution can reach approximately 1:390 to 1:765.

If used for pre-washing for weekly dirt: the recommended dilution ranges from pure to 1:20; then use up to 50 ml of product and fill the remaining part with water (950 ml) to obtain 1 L of ready-for-use solution. While dispensing, the actual final dilution can reach approximately 1:315.

Precautions: do not apply in the sun and on hot surfaces, fabrics or porous surfaces. Do not let the product dry. When diluting the pure product it is advisable to use suitable gloves and be careful to protect your hands and clothes from the pure color as it is highly concentrated.

Caution:
Observe the advice on the safety data sheet when handling the product.

Technical features:
Appearance and colour: pink liquid
Odour: characteristic
pH: 6,0 ± 0,5
Flash point: >100 °C
Relative density: 1,10 g/cm3 ± 0,05
Solubility in water: soluble
Solubility in oil: partially soluble

Storage:
Unopened and stored at room temperature away from direct sunlight.

Packaging:
